

Engage your guests and amplify your event.

What is Swell Slides?

Swell Slides combines real-time social media posts, your custom slides, custom background and video into one seamless presentation. No need to switch back and forth between your presentation and a social wall. With Slides, you can create an interactive presentation loop that engages guests.

Why?

It's fun and can set your event apart from the rest. You can make it your own. Swell's presentation app is customized for your event and the combinations are endless. **Events are social.** Encourage your guests to spread the word by rewarding them with a re-post on screen!

How does it work?

You start with a login and can build your customization from anywhere. Then, download our presentation app onto the computer that will run the screen. (Note: this means that your presentation can be sent from a different location.) The app will download the presentation and your settings. Then, click Start Show.

Why an app?

The app enables the presentation to store information locally which means it is less vulnerable to weak internet connections. (PC or Mac)

How to measure the value of a social wall?

Calculate the number of online mentions using your event hashtag X the reach of your guests = awareness generated by the social wall.

How much does it cost?

\$249 per event

How do I get set up?

Go to swellfundraising.com to sign up for a 10-minute demo and get started.

** Combined with our instant giving tools, Swell Slides can show your fundraising totals and thank donors too.
